

- the compact TFT solution for the OxTS RT family and systems with CAN output

Based on our CANonVi platform we are providing a 3.5" daylight readable color TFT in a robust aluminium housing.

- Two CAN-inputs to connect to your device with the possibility of daisy-chaining
- 64 fully user configurable CAN input channels per setting on up to 20 pages
- 12 user defined pages with settings to choose from our templates - examples above
- Flip with the dial through the pages without delay
- Direct access to the RT status messages without PC
- Save and restore settings for infinite possibilities tailored to your needs
- Connect to your PC, Mac or Linux machine via Ethernet for set-ups
